ORANGE, CALIFORNIA

Foreward

GREETINGS! To all our old friends and customers and those of you whom we hope to add to our growing list of satisfied customers. We deeply appreciate the many letters extending good wishes and praising the quality of our stock. May we take this opportunity to thank you all?

We take pride in again presenting our list of fine iris and hemerocallis. We believe the list comprises many of the latest and finest developments of these wonderful garden plants. Our policy of listing at as low a price as possible, enables you to choose the varieties you especially want and you will note that our prices compare favorably with those offered by other dealers.

We ship healthy one year plants free from disease and extras of known quality are included with orders. If anything is unsatisfactory, please let us know about it and we will do our best to make it right.

Due to the encroachment of subdivisions, we were forced to move our gardens farther out. They are now located two miles north of central Orange on Taft Ave., between Glassell and Batavia, but still in the midst of the beautiful orange groves which gave us the incentive to name our nursery Groveland Gardens. Our home address remains the same for the time being, Rt. 3, 754 North Shaffer Street, Orange, California.

Introductions for 1954

We are proud to introduce two outstanding new iris from hybridizers of national repute. Mr. Richard Goodman of Riverside, Illinois, and Mr. Roy Fielding of San Gabriel, California. The descriptions are those given by Mr. Goodman and Mr. Fielding.

Golden Shell (Goodman, R. 1954) (New Gold X Spun Gold) 44". Golden Shell is a large, deep golden yellow self. The standards are fully domed and entirely closed, with crimped finish like a shell. The falls are without halt marks or pinching. The golden yellow color is pure and clean without an overlay of darker yellow and it is one of the deepest yellows in commerce today. The flowers have very beautiful form which is retained until they wither due to its heavy substance. Branching is wide and the flowers are well spaced on exceedingly heavy stalks, which stand up well in bad weather. It increases well and produces fine rhizomes, which in my garden do not multiply excessively, as is the case with many yellows, which produce too many offshoots and thus crowd the clumps. **\$15.00 net.**

Alba Royale (Fielding R. 1954) (Snow Flurry X Azure Skies) 40". This is a superb white iris with flaring falls and heavy substance and with only a hint of yellow in its throat and beard. Its branching is excellent and a total of 12 blooms may be expected from each well grown stalk. It will produce seed plentifully if pollenized by a congenial mate. It also carries pollen. The stalk that received so much acclaim at the 1953 Hollywood Iris Show, had been grown without any special care on the north side of a five foot wall where it got plenty of light but no direct sunshine. A small side dressing of bone meal had been applied. Its height of 45 inches was perhaps due to "reaching for the sun rays." In a sunny location about 40" may be expected. **\$20.00 net.**

Tall Bearded Iris for 1954

TOURNAMENT QUEEN (Milliken) A large two toned fuchsia colored iris. The standards and falls are broad and the center is lightly touched with soft green. Attracts all garden visitors. 38"	1.00 3 for 2.50
TRAILBLAZER (Milliken) Brilliant mulberry purple highlighted with a blue blaze at the tip of the beard which spreads over the lower part of the falls. A touch of red near the beard enhances its beauty. 38"	5.00
TRANQUILITY (Fay) A lovely flower of purest white, even to the beard. The flower is rounded with domed standards and flaring falls. An exquisite iris appropriately named. 38"	5.00
TREVA (DeForest) There are many golden tan blends, but none more attractive than Treva. It has a glistening frosty finish quite unlike anything else. 36"	.75

TWILIGHT SKY (Fay) A deep pink of rich coloring, fine form and heavy substance. Hardy and a fast increaser. One of our favorites. 38" ----- **1.00 3 for 2.50**

VANDA (Miles) One of the purest of large pale blues. One of the parents of the lovely Vandabeth. A much sought after Canadian novelty. 38" ----- **3.00**

VELVET DUSK (Schreiner) A descendant of Sable and it has somewhat the same coloring but it has a richer velvety finish. The flowers are very large and flaring. Brown beard. 36" ----- **1.50**

VENTURA (Walker) A brilliant rose self with mulberry infusion. A bright brown patch on each side of the beard intensifies its coloring. Grows fast and blooms profusely ----- **1.00 3 for 2.00**

VICTORIAN VEIL (Craig) A big, heavily marked ruffled rose violet. The standards are slightly lighter than the falls, giving it the appearance of a bitone. 40" ----- **5.00**

VIGIL (Wills) A pure white with large blooms of smooth firm texture. The clean hafts are without markings of any kind. An iris that appeals to the amateur gardener because of its beauty of coloring, fine form and long period of bloom. 40" ----- **1.00 3 for 2.00**

WHISTLING SWAN (Waters) Large ruffled flowers of heavy textured pure white, with a golden center, even to the beard. Very hardy and a fast grower. 38" ----- **1.00 3 for 2.00**

WHITE RUFFLES (Taylor) A large ruffled cream white with a golden center, even to the beard. One of the most beautiful of all white irises ----- **1.00 3 for 2.00**

WHITE PEACOCK (Pattison) An exquisite soft blue white. The flowers are heavily ruffled and flare widely. The stalks are tall and well branched and the foliage luxuriant. The flower comes out a soft blue white hence the former name of White Christmas which was not available. It turns pure white later on. An iris you will want to grow. 38" ----- **15.00**

WHITE SPRITE (Cassebeer) A delicately ruffled white iris with a grace and charm that is most appealing. The smooth textured blooms have good substance. 37" ----- **7.00**

WINSTON CHURCHILL (Stevens) A deep crimson red self. The standards are arched and the falls slightly ruffled and very velvety. A rich gold beard provides an accent of color against the rich red. 36" ----- **1.00**

YOUR WORSHIP (White) A red brown self of medium size with a velvety finish. Good form and a profuse bloomer ----- **1.00**

ZANTHA (Fay) A huge flower of deep golden yellow and lustrous velvety finish. For a blaze of color this variety can't be beat ----- **2.50**

Hemerocallis

(Daylilies for every Garden)

Hemerocallis are providing a new interest for flower collectors. They have undergone a period of development the past ten years which makes it quite difficult to keep up with all the best of them. We are trying out a great many of the newest and will try to list only the finest of their respective colors at reasonable prices. They flourish in almost any soil and in any part of the United States. They require plenty of moisture, but appreciate good drainage. De.—denotes deciduous. Ev.—Evergreen.
